Summary

Aspiring LLM/GenAI Engineer with hands-on experience building agentic AI systems, RAG pipelines, and production automation workflows. Skilled in LangChain, LangGraph, vector databases, and multi-agent orchestration. Shipped 4+ end-to-end AI projects spanning security, fraud detection, and developer tooling.

Technical Skills

AI/ML: Machine Learning, Deep Learning (CNNs, Transformers), GenAI, LLMs, NLP, Computer Vision
Agentic AI & RAG: LangChain Agents, LangGraph, Multi-Agent Orchestration, RAG, Vector Databases (Pinecone, Chroma), Prompt Engineering, MCP
Frameworks & Libraries: LangChain, AutoGen, Scikit-learn, Hugging Face, OpenCV, NLTK
Programming & Tools: Python, SQL, JavaScript, n8n, Git, Docker

Education

Indus University

B.Tech in Computer Science (Minor: IoT)

July 2023 – June 2027

Ahmedabad, Gujarat

Experience

Phaze AI

Dec 2025 – Feb 2026

AI Automation Intern

Remote

- Architected 5+ n8n automation workflows for real-world business processes, reducing manual task time by 40%.
- Deployed agentic AI systems using LangChain and LLMs for autonomous decision-making and task execution.
- Integrated 6+ third-party APIs into production-ready AI automation pipelines.

Projects

OfferGuard AI (Reverse Interview) | Multi-Agent GenAI, TanStack Start, React 19 [Code]

2026

- Built 8 specialized AI agents (toxicity scanner, burnout predictor, salary analyst, ghost-hiring detector, negotiation coach) analyzing job offers in under 60 seconds.
- Integrated multi-provider LLM routing (Groq, Mistral, Gemini, OpenRouter) via Vercel AI SDK for redundant, cost-optimized inference.
- Shipped full-stack app with Firebase auth, OCR document parsing (Tesseract.js/pdf.js), Playwright E2E tests, and CI/CD via GitHub Actions.

Codebase Oracle | LLM + RAG System

2025

- Engineered LLM-powered RAG system for natural-language Q&A over codebases, structure, and dependencies.
- Optimized vector embedding retrieval for faster, more accurate query responses across large repos.

ResumeMaster AI (Job Snipper) | GenAI Platform

2025

- Developed agent-based resume optimization platform using LangChain for semantic job-fit analysis.

UPI Fraud Detection System | Machine Learning

2024

- Built ML fraud-detection pipeline with feature engineering, improving detection accuracy via model optimization.
